## SCIVERALENS CAN HELP YOU

### ENSURE your brand integrity

Screen formulations for sourcing and product development. Use our **23 toxicological endpoint** system to proactively identify potential issues and find safer alternatives.

**Understand your company's chemical footprint.**

### WORK faster/dive deeper

Manage compliance and certification requirements automatically. **Simplify data gathering, list-screening, and chemical hazard assessments** with an **easy-to-understand interface.**

### SAVE money

Benefit from the largest chemical data repository with **more than 4,000 verified chemical hazard assessments** from board-certified toxicologists. Build a configurable plan to fit your needs and budget.

### UNITE your supply chain

Whether you're a supplier or a brand, feel confident **submitting or receiving chemical reports** with redacted information that **protects intellectual property** while providing necessary chemical safety information.

Market your achievements in green chemistry and sell more!

SciveraLENS supports many green chemistry initiatives and certification programs including:

Screened Chemistry Certification  
EIM Product Scoring  
Nike's Innovation Assessments  
Intel's Green Chemistry program  
ZDHC MRSL Conformance  
EPEAT Registration  
Costco's formulated product review

Labeling of Hazardous Materials Act (LHAMA) evaluation and certification

AND MORE!
